

OXILOCK[®]

plasma

THE BIGGEST REVOLUTION SINCE THE
BIRTH OF PERMANENT COLOUR

What is “OXILOCK plasma”?

OXILOCK plasma is the exclusive complex of organic substances developed by the Jean Paul Mynè laboratories, which allow the **revitalisation of damaged keratin fibres**.

Used simultaneously with all chemical treatments in the salon, it allows **recovery of the hair's health** with “miraculous” results. Free from “ghost” chemicals, silicone, sulphates, aldehydes or other aggressive substances, it contains a priceless blend of organic acids, amino-acids and special zinc salts which combine with the damaged hair structure to restore life to it

What does it do?

- It considerably increases the hair's strength.
- It visibly reduces the damage to brittle hair.
- It restores even the most badly damaged hair to a healthy condition.
- It reconstructs the structure while the most aggressive chemical treatment(s) are taking place.

JEAN PAUL MYNÈ[®]
HAIR PROFESSIONAL

OXILOCK plasma Miracle No.1

It restores damaged hair fibre before, during, and after aggressive chemical treatments and can be used as the ideal tool for obtaining fantastic results in any situation. The hair regains health amazingly in terms of resistance to breakage and reduction of brittleness (especially on 'porous' hair, damaged or weakened by the standard chemical treatment).

**1 Kit does
90 Treatments**

1 Kit contains:
- 1 Miracle No.1 500ml
- 2 Come True No. 2 500ml

OXILOCK plasma Come True No. 2

It works in synergy with OXILOCK plasma no. 1 and is necessary to optimise the results of all salon services, maximise performance and guarantee excellent results in every situation.

It is a concentrate of organic substance which restores the health of the hair's keratin fibres, completing the OXILOCK plasma treatment.

You'll never want to be without it

It will become the essential ally for the well-being of your clients' hair and for your work as a stylist. Finally freeing you from the constraints and fear of damaging hair with extreme styling procedures, enabling you to work in total safety and achieve results you never could before

Simple, Safe, and Revolutionary

It does not change the way you work.

It does not add any steps to the standard colouring and bleaching process

Absolute Benefits

- It multiplies the keratin bonds and improves and reinforces the fibre damaged during the previous treatments and the one currently in progress.
- It improves the hair's quality and structure visibly and instantaneously.
- Immediate and gradual effects.
- It guarantees safety for every type of technical procedure.
- Absolute stylistic and colouring freedom.
- It simultaneously protects against and prevents damage by aggressive chemical treatments.
