Swing 1- normal hair

Swing is a practical and innovatory three-phase single-dose permanent system. The innovatory acid technology combined with the restructuring action of the protein pre-fixing supplement guarantees exceptional respect for hair and an improved shape restoring action. Result: longer-lasting curling, bulkier hair, more elastic crimps. Reference 1 is especially calibrated for optimizing normal hair curling.

Package: single-dose kit containing

- 1 bottle 100ml curling fluid for normal hair
- 1 bottle 80ml protein supplement
- 1 bottle 100ml conditioner fixing lotion

Specifications

A – Curling fluid

Ph: 7,5 – 8,5
Density: 0,97 – 0,98
Color: TRANSPARENT
Fragrance: STRAWBERRY

B- Protein Supplement

Ph: 7,5 – 8,5
Density: 0,97 – 0,98
Color: TRANSPARENT
Fragrance: STRAWBERRY

C- Conditioner Fixing Lotion

Ph: 2,5 – 3,5
Density: 0,97 -0,98
Color: WHITISH
Fragrance: STRAWBERRY

Instructions for use:

Shampoo and rinse delicately. Avoid irritating the skin. Towel-dry excess water. Protect the skin around the hairline with a cream / oil barrier and a moist cotton band. Part hair into sections and go ahead with rolling up by applying a mild tension.

Start from the head top and apply the curling fluid on the upper, lower and central part; wet each roller without soaking. Count down treatment time. When finished with the application, renew the wet cotton.

Treatment time: 8-20 minutes without heating aids. After five minutes carry out a first check on the lock. In case of an unsatisfactory result, repeat the check on the lock every three minutes.

After completing the procedure rinse thoroughly with lukewarm water for two minutes, dry with a towel and apply the supplement on the upper, central and lower area of each roller. Leave in for two more minutes. Apply the conditioner fixing lotion on each roller without rinsing and start from the head top. Leave in for five minutes. Remove the rollers carefully without pulling the hair. Apply the remaining part of the fixing lotion on the ends and massage. Rinse thoroughly for two minutes without cleansing with water.

Caution The curling product contains derivatives of thioglycolic acid. Avoid contact with eyes. In case of accidental contact with eyes, rinse with water immediately and see a doctor. Avoid contact with ears and skin too. Always wear suitable gloves. Keep out of reach of children. Read safety directions carefully before using.

Active elements:

CYSTEINE

It is a copolymer of cysteine amino acid and silicon, primarily developed as an advanced conditioning element that proves especially effective on haircare products.

Benefits:

- prevents and repairs damages to the cuticle
- seeps into the cuticle and conditions it from inside
- Binds with the hair keratin in a bivalent way
- thanks to its molecular weight it guarantees the creation of a hard-wearing film around the hair
- has a beneficial effect on the hair mechanical properties
- prolongs the duration of "curls" after perm
- allows a polishing effect

Usage tips:

Do not use on the same day of a chemical treatment

Swing 2- fine and thin hair

Swing is a practical and innovatory three-phase single-dose permanent system. The innovatory *acid technology* combined with the restructuring action of the protein pre-fixing supplement guarantees exceptional respect for hair and an improved shape restoring action. Result: longer-lasting curling, bulkier hair, more elastic crimps. Reference 2 is especially calibrated for optimizing fine and thin hair curling.

Package: single-dose kit containing
1 bottle 100ml curling fluid for normal hair
1 bottle 80ml protein supplement
1 bottle 100ml conditioner fixing lotion

Specifications

A – Curling fluid

Ph: 7,5 – 8,5
Density: 0,97 – 0,98
Color: TRANSPARENT
Fragrance: STRAWBERRY

B- Protein Supplement

Ph: 7,5 – 8,5
Density: 0,97 – 0,98
Color: TRANSPARENT
Fragrance: STRAWBERRY

C- Conditioner Fixing Lotion

Ph: 2,5 – 3,5
Density: 0,97 -0,98
Color: WHITISH
Fragrance: STRAWBERRY

Instructions for use:

Shampoo and rinse delicately. Avoid irritating the skin. Towel-dry excess water. Protect the skin around the hairline with a cream / oil barrier and a moist cotton band. Part hair into sections and go ahead with rolling up by applying a mild tension. Start from the head top and apply the curling fluid on the upper, lower and central part; wet each roller without soaking. Count down treatment time. After completing the application replace the wet cotton band.

Treatment time: 8-20 minutes without heating aids. After five minutes carry out a first check on the lock. In case of an unsatisfactory result, repeat the check on the lock every three minutes.

After completing the procedure rinse thoroughly with lukewarm water for two minutes, dry with a towel and apply the supplement on the upper, central and lower area of each roller. Leave in for two more minutes. Apply the conditioner fixing lotion on each roller without rinsing and start from the head top. Leave in for five minutes. Remove the rollers carefully without pulling the hair. Apply the remaining part of the fixing lotion on the ends and massage. Rinse thoroughly for two minutes without cleansing with water.

Swing 3- treated hair

Swing is a practical and innovatory three-phase single-dose permanent system. The innovatory *acid technology* combined with the restructuring action of the protein pre-fixing supplement guarantees exceptional respect for hair and an improved shape restoring action. Result: longer-lasting curling, bulkier hair, more elastic crimps. Reference 3 is especially calibrated for optimizing treated hair curling.

Package: single-dose kit containing

- 1 bottle 100ml curling fluid for normal hair
- 1 bottle 80ml protein supplement
- 1 bottle 100ml conditioner fixing lotion

Specifications

A – Curling fluid

Ph: 7,5 – 8,5
Density: 0,97 – 0,98
Color: TRANSPARENT
Fragrance: STRAWBERRY

B- Protein Supplement

Ph: 7,5 – 8,5
Density: 0,97 – 0,98
Color: TRANSPARENT
Fragrance: STRAWBERRY

C- Conditioner Fixing Lotion

Ph: 2,5 – 3,5
Density: 0,97 -0,98
Color: WHITISH
Fragrance: STRAWBERRY

Instructions for use:

Shampoo and rinse delicately. Avoid irritating the skin. Towel-dry excess water. Protect the skin around the hairline with a cream / oil barrier and a moist cotton band. Part hair into sections and go ahead with rolling up by applying a mild tension.

Start from the head top and apply the curling fluid on the upper, lower and central part; wet each roller without soaking. Count down treatment time. After completing the application replace the wet cotton band.
